ROTBLOC

INTEGRITY UNDER PRESSURE

**ROTBLOC IS ROUTINELY TESTED IN FIELD STUDIES
IN HILO, HAWAII BY OREGON STATE UNIVERSITY'S WOOD
SCIENCE AND RESEARCH DEPARTMENT.
FOR THE PAST 6 YEARS, THESE TESTS HAVE PROVEN THAT
ROTBLOC REMAINS INTACT UNDER THE MOST SEVERE UVA
EXPOSURE, HUMIDITY, MOISTURE AND ENVIRONMENTAL
DECAY PRESSURES. ROTBLOC PREVENTS CHEMICALS WITHIN
CONVENTIONALLY TREATED WOOD FROM LEACHING
INTO THE SURROUNDING SOIL. ROTBLOC SUCCESSFULLY
MAXIMIZES THE SERVICE LIFE OF WOOD POSTS .**

LDPE: The compound we have chosen has decades of research and development. It is impervious to chemicals and water. Maintaining its integrity under extreme UVA and environmental conditions and biodiversity, it remains flexible, intact and has proven durable.

ADAPTIVE SEAL: This integrated feature is an inward facing flange that provides a substantial seal at the top edge of the product. It is designed to maintain contact with the wooden post to help keep out organic debris.

ALL OTHER ALTERNATIVE PRODUCT OPTIONS ON THE MARKET ARE EITHER VERY COSTLY, REQUIRE SPECIAL TOOLS, OR DO NOT HAVE A POSITIVE IMPACT ON THE ENVIRONMENT.
